

18 March 1964

MEMORANDUM FOR THE RECORD

SUBJECT: Meeting of the Image Enhancement Working Group, 17 - 18  
March 1964 at [REDACTED]

25X1A

1. Attendees:

[REDACTED]

25X1A

2. The major purpose of the business portion of the meeting had been to receive guidance on the purpose and goals of the working group from the parent committee on ground photography. However, since the parent committee did not have a representative or envoy at this meeting, its guidance, of course, was not forthcoming. The Working Group on Image Enhancement appears to be existing "in limbo" with no particular charter for the future. The members have had no contact with the parent committee for months and nobody present at this meeting was certain if the parent committee was even still in existence. It was recommended that [REDACTED] and the undersigned contact the Executive Secretary of the parent committee ([REDACTED]) to ascertain the continued existence of the committee and the current and future role of the ground photography parent committee.

25X1A

3. On the technical side of the meeting, there were, in addition to much informal discussion, several formal briefings to the Working Group. These were as follows:

a. "Semi-Automatic Target Screening System" - a proposed system presented by [REDACTED] tion, Cambridge, Massachusetts.

STATOTHR

b. "Image Intensification as Applied to Night Vision Devices" by [REDACTED]

STATOTHR

c. "Activities of the Intelligence Division of [REDACTED] 25X1A

d. "Activities of the Photogrammetric Division of [REDACTED] 25X1A

25X1A

Development Branch, P&DS
